Respectable  
Director of Health  
Chen Hon-yee

Dear Madam:

Glad to see your reply letter today, you told for me: "to shot the **flu vaccine** is one effective way to prevent influenza and its complications," as well as "... very safe, in addition to the vaccination may occur at the pain, red and swelling outside, general have no other side effects. ", However, this is clearly not enough, the question is that "virus" quantity contained in the **flu vaccine** yes or no effective only is significant!

On account of to save the SARS national calamity of Hong Kong with China that "wash lung" treatment invention basis it had a latest medicine discover of the "germs infection" only is the principal cause for flu no the "virus infection"! But in the past, **an erroneous ethics in medicine**, namely the "virus" can in "host body within to self-Copy to breed", so lead a more erroneous ratiocination is by a "quantitative contain virus" in the "vaccine" will be to excite to produce an antibodies to viral!

However, the **"viral genes can no to replication"** still has not to conclusion in the west science! For example, the textbook of USA **Yale University** on 2009year, to see the page3 of 《Transcription and Replication of the Viral Genome》 section, that "Replication of Virus Genes" was very clear, the head two paragraphs as follows:

- ☐ The influenza viral genome is made up of negative sense strands of RNA. In order for the genome to be transcribed, it first must be converted into a positive sense RNA to serve as a template for the production of viral RNAs. ☐
- ☐ Replication of the genome does not require a primer; instead, the viral RNA dependent RNA polymerase (RdRp) initiates RNA synthesis internally on viral RNA. This is possible, as the extreme 5' and 3' ends of the genome exhibit partial inverse complementarity and, hence, are able to base pair with one another to form various corkscrew configurations. It appears that a great number of di-nucleotide base pairs form, although the full mechanism of viral genome replication is still yet to be understood [13-16]. ☐

From above to add the **baseline**,  the **"whether the viral genes can be replicated"** still has no conclusion in the western science!

And, according to the textbook of **Southwest Minzu University** of China: "Viruses must enter cells and replicate using host cell macromolecular synthesis with energy devices, so in many ways **the virus replication research is the study of the virus's interaction with its host.**", so the virus replication mechanism is still not finalized!  Notwithstanding the textbook still by **Southwest Minzu University** also refers to: "The multiplication of viruses is carried out only in living cells, by the viral genes for a template to act upon by enzyme, then to synthesize their genes and proteins after, again to fabricate the complete virions, this a manner is called **copy** or **replication.**"

Similarly, the published from Graduate Institute of Microbiology and Public Health of NCHU of TW on Oct. 16, 2008, the second paragraph that first sentence to pointed out: "At present, for flu virus to transfer record between replication that mechanism of gene transfer still is not very clear! 

For related textbooks originals from [www.ycec.net/tw/131017.pdf](http://www.ycec.net/tw/131017.pdf) can to download, this is I had a recite at Taiwan Intellectual Property Court on Oct. 17, 2013. That is to say, "the replication of the viral genes" still can not be confirm by the Chinese and Western scientific circles! 

Therefore, you must to know that" vaccination is an effective way to prevent influenza. "it was premature to say! And in Hong Kong, previously vaccinated after still again influenza to flu a lot, but you always call out Microbiology Professor **Kwok-Yung YUEN** of HKU this one king of viper at TV again proceed to deceive public said that is the mutation of virus! 

Another example is the death of aborted fetus or pregnant women are dead too, but your Department or

**Kwok-Yung YUEN** who also abiding to arrogation that was another disease, so you to killed life after runaway by this ghosts trick that will to intolerable by the course of nature!

It not only as this, at the [www.ycec.com/UN/141027.pdf](http://www.ycec.com/UN/141027.pdf) can to see, I had a letter to interrogation **Margaret Chan Fung Fu-chun** of WHO on October 27, 2014 by registered post with facsimile, and you also acknowledge to received, between the 3-4page that had a very simple little experiments of 『virus genes is not be replicated』 at once can to bankruptcy for 『virus genes be replicated』 of all vaccine foundation same the below:

Any a small hospital could be to draw small blood of content “**virus**” samples from flu patient again to shoot in same blood type but no flu of a health person body, and by this converts host to test the “**virus concentration**” in new host can or not self-replication to lift and then to temperature?

I think, your health department can easily do this small experiment, if the “virus” can not to converts host after replication by self, then, by this for the based of flu shoot already is harmful and useless that need not again to demonstration!

If your Department of Health is afraid to do this small experiment, and the **Ko Wing-man** who again at TV continue to lure public to shoot flu vaccines, the surface proof of murder public and waste public funds when the table was established! 📷

Therefore, in order to save more lives, please truthfully to tell me the details of the experiment with results within 10 days!

This letter will facsimile to **Ko Wing-man** receive simultaneously, because a human life is of greater value than everything, please feel free to discuss by telephone, fax or e-mail can be!

And to see the other attachments of nine pages, if again to conceal I to save the SARS national calamity of Hong Kong with China that “wash lung” treatment invention again to kill incalculable citizen and not change that cause and effect, I have just sent a letter to query just leave Hong Kong the China's top legislator **Zhang Dejiang** on yesterday, but he did not dare reply then to go back! Therefore, I at once by a letter to Legislative Council Secretariat of HK to requests forwarded assignment any Members to follow up, this same relation very important for your Department of Health and Food and Health Bureau relations great the same, the letter also can be downloaded at : [www.ycec.com/HK/160518b.pdf](http://www.ycec.com/HK/160518b.pdf) 📧

If you have any not alike an opinion, welcome to point out for discussion by Tel: 852-3116-0137 or Fax: 852-3111-4197.

Regards!
